Applicant's amendment filed on 1/18/06 has been entered. Accordingly, claims 1-3, 7-10, 13, and 15-16 have been amended. Claims 5-6, 11-12, 14, and 17-20 have been canceled, and claims 21-27 have been added. Application is now in condition for allowance.

Reasons for allowance

Claims 1-4, 7, 10, 13, 15-16, and 21-27 are allowed.

The following is an examiner's statement of reasons for allowance: applicant's amendment and accompanying remarks has persuaded the examiner to place this application in condition for allowance.

Claim 1 is allowed because the prior art of record failed to show or suggest a support having adjacent, substantially planar surfaces, and plurality of LEDs mounted on the planar surface, defining a reentrant angle, said support defining an interior angle between the planar surfaces, measured within the support greater than 180 degree as presented in claim 1. Therefore, claim 1 is allowed.

Claims 2-4, and 7 are allowed because being depended on base claim 1.

Claim 8 is allowed because the prior art of record failed to show or suggest two substantially planar elongate PC boards, a linear array of LEDs mounted to each of the PC board, each of the LED having an optical axis, the optical axes of each said linear array collectively defining a direction of light transmission for each linear array, and a circuit for simultaneously energizing the LEDs, wherein the LEDs produce light when energized, the PC boards supported so that said linear arrays are substantially parallel

and the direction of light transmission of said linear arrays intersect at an angle of approximately 90 degree.

Claims 10, 13, and 15-16 are allowed because being depended on base claim 8.

Claim 21 is allowed because the prior art of record failed to teach or suggest an aircraft position light having a support defining two substantially planar surfaces adjacent to each other along one edge, said surfaces defining an included angle of less than 180 degree, a substantially planar, thermally conductive PC board mounted in thermally conductive relationship to each said planar surface, a plurality of LEDS mounted to each said PC board, each said LED having an optical axis, the optical axes of said plurality of LEDS collectively defining a direction of light transmission for each said plurality of LEDS, wherein the direction of light transmission of one said plurality of LEDS intersect the direction of light transmission of the other said plurality of LEDS.

Claims 22-27 are allowed because being depended on base claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
